

Motorbike Product presentation

Motorbike Molygen 4T Scooter

High-performance motor oil based on synthetic technology. With an innovative recipe and the added bonus of the special Molygen additive. Ensures the best possible protection and retention of engine value as well as perfect lubrication and maximum performance under all operating conditions. Prevents the formation of deposits, lowers frictional losses in the engine and considerably reduces wear. This extends the engine's service life and reduces consumption. Tested for catalytic converters and under racing conditions.

For air and water-cooled 4-stroke scooter engines with dry clutch, automatic or Variomatic transmission that require a lubricant of this specification. Suitable for normal to extreme operating conditions.

Properties

- outstanding engine cleanliness
- excellent wear resistance
- optimum lubrication under all operating conditions
- ensures maximum engine performance
- guarantees low oil consumption
- optimum stability to aging
- tested for the use with catalytic converters

with
molecular
friction
control

Note: The specifications and instructions from the assembly or vehicle manufacturer must be followed. Optimum effect only when the product is used unmixed.

Part no.	Product	Cont.	Language	PU
21718	Motorbike Molygen 4T 5W-30 Scooter	1 l	D-Booklet	6
21719	Motorbike Molygen 4T 10W-40 Scooter	1 l	D-Booklet	6

A new molecular dimension Enlighten your engine with Molygen

High quality premium motor oil in combination with an effective chemical friction modifier permanently protects the surface of all parts in the engine and leads to increased fuel economy. The fluorescent green oil is grading the area of contact and ensures optimal performance.

Step 1

Friction of rough metal surfaces with motor oil

Step 2

Chemical friction modifier hardens the metal surface

Step 3

Smoothing and refining the surface structure
