Cera Tec

High-tech ceramic wear protection. Reduces friction and wear through ceramic compounds offering high chemical and thermal resistance. Prevents direct metal-to-metal contact, thus increasing the assembly service life. Reduces fuel consumption in gasoline and diesel engines thanks to the low-friction effect. Miscible with all commercially available motor oils and motor vehicle gear oils.

Area of use

For engines, manual transmissions, pumps and compressors. Is added to the respective oil. Self-mixing. Sufficient for 5 liters of oil. With a long-term effect lasting around 50,000 km. Suitable for toothed belts running in oil. Not suitable for use with wet clutches!

Molygen Motor Protect

Synthetic and oil-soluble engine-oil additive which has been developed according to the latest technology for use in modern gasoline and diesel engines. The surface active components of this high-pressure/anti-wear additive in combination with new friction modifiers reduce mechanical wear and friction by modifying the surfaces.

For gasoline and diesel engines. Not suitable for use on motorbikes with wet clutches.

500 ml	6	1015 ¹⁸
--------	---	--------------------

Motor Protect

Full synthetic motor oil additive. It significantly reduces wear. High-pressure wear protection additives create a very thin layer on the engine friction points that is moldable and low-friction under wear conditions. Its effectiveness lasts for at least 50,000 km. That produces these benefits: • Significant wear reduction • Extended engine service life • Fuel and emissions reduction through smooth-run effect • Optimal engine power, quiet running.

The additive is added to the new oil AFTER an oil change. 500 ml sufficient for up to 5 l motor oil. Adding to low-friction full-synthetic low-viscosity oils reduces wear further by approx. 35%. With long-term effectiveness for 50,000 km (comply with oil change intervals from vehicle manufacturer).

Oil Additive

The low-friction lubricant MoS₂ creates a heavy-duty lubricant film on all frictioning and sliding metal surfaces. It reduces friction, guaranteeing the aggregates run more smoothly. That produces these benefits: Significant fuel and oil saving, scientifically proven wear reduction, high reliability, anti-friction properties.

Suitable for all commercial motor oils in gasoline and diesel engines with and without diesel particulate filter (DPF). Tested safe with catalytic converters and turbochargers. Our dosage recommendation: add from 3 - 5% to motor oil. For motorcycles with wet clutches, add maximum 2% of the oil filling volume.

Oil Sludge Flush

The perfect solution for cleaning the engine from the inside. Removes black sludge and other contaminants and deposits. Increases the operational reliability of the engine and prevents lubrication deficiency. Gently cleans oil holes, oil screens, piston ring grooves and ducts and prevents engine damage.

Suitable for all commercially available motor oils in gasoline and diesel engines with and without a diesel particulate filter (DPF). Tested for use with turbochargers and catalytic converters. Add approx. 200 km before the oil change. Contents sufficient to treat up to 5 liters of motor oil. Can be safely used in vehicles with timing belt running in oil. Not suitable for motorbikes with a wet clutch.

Viscoplus Heavy Duty Formula

High-performance additive for stabilizing the viscosity of motor oils. Keeps motor oil viscosity stable and ensures constant oil pressure. It provides superb protection against mechanical shear loss of the motor oil under even the harshest conditions. Prevents thinning of motor oil caused by frequent cold starts. Oil consumption is reduced by means of improved sealing of movable engine parts.

Suitable for all gasoline and diesel engines with and without diesel particulate filter (DPF). Can be mixed with all commercially-available motor oils. 1 l sufficient for up to 20 l of motor oil.

Motor Clean

Flushes out and cleans the inside of the engine. Highly effective cleaning additives dissolve sludge and lacquer formers, envelop solid dirt particles and liquid contaminants and ensure that these are drained along with the waste oil during an oil change. In a clean engine, the fresh oil can then realize its full potential. Optimal engine performance and emission characteristics, reduces wear and prevents lubrication deficiency.

Suitable for all commercially available motor oils in gasoline and diesel engines with and without diesel particulate filter (DPF). Tested for use with turbochargers and catalytic converters. Can be safely used in vehicles with toothed belt running in oil. Not suitable for motorbikes with a wet clutch.

ATF Additive

Optimally cares for rubber and plastic seals in steering gears and automatic transmissions. Leaks on transmissions and gears, caused by hardened and brittle seals, are prevented and eliminated. Cleans holes and channels in the transmission and refreshes the oil's performance. Reduces noise formation and improves the shifting in automatic transmissions. Extends the life of steering gears and automatic transmissions.

Add ATF Additive to the power steering reservoir or add to the transmission oil through the dipstick. The contents of 250 ml are sufficient for up to 8 l oil volume. Suitable for steering gears and automatic transmissions that are filled with ATF II and ATF III oils.

Hydraulic System Additive

For protecting and maintaining hydraulic systems and their sealing materials such as O-rings. Reduces friction, lowers the oil temperature, slows down oil aging and provides optimal protection of components of the hydraulic system, e.g. pumps, against wear. Prevents corrosion, foam and sludge formation and deposits. Reduces the risk of repairs and the downtimes and lowers the operating costs.

For hydraulic systems in industry, in construction and commercial vehicles as well as for assemblies used for agriculture and forestry.

Transmission Cleaner

The special cleaner additive package allows all dirt to be dissolved and drained off with the next oil change. Cleaning ensures a long transmission life and soft, easy gear shifting. The cleaner is neutral to metals, plastics and rubber seals.

Area of use

Special cleaner for manual transmissions, power take-off and differential transmissions. Contents of the can sufficient for up to 4 liters of oil.

Cont.	Packaging Unit	Part no.

Automatic Transmission Cleaner

Cleans and frees the ATF circuit of deposits and residues. Provides for optimal shifting performance and prolongs transmission service life.

Suitable for all automatic transmissions. Contents of can are sufficient to treat 6-9 liters of oil. Can be added to the gear oil through the dipstick opening using a funnel or used in all commercial automatic transmission cleaning devices.

300 ml	6	2512 ¹

Gear-Oil Additive

Contains highly concentrated MoS₂ to reduce wear in manual and differential transmissions, axle drives without integrated wet differential locks and mechanical steering systems. MoS₂ reduces temperature peaks and ensures quieter running and smoother shifting. The transmission heats up less and benefits from smoother tooth faces in terms of quieter running and improved performance.

For manual and differential transmissions, axle drives without integrated wet differential lock and mechanical steering systems, especially under high thermal loads.

Gear-Oil Leak Stop

Regenerates rubber and plastic transmission seals such as shaft seals and prevents oil stains under the vehicle. Protects clutches from oil fouling and prevents incomplete lubrication and transmission damages that are caused by too low an oil level. Prevents polluting oil stains.

For manual transmissions, power take-off and differential gears. Contents are sufficient for up to 1 l transmission oil. **Not suitable for DSG or automatic transmissions or differentials and motorbikes with wet clutches.**

50 ml	12	1042
-------	----	------

Power Steering Oil Leak Stop

The additives contained provide optimum care for rubber and plastic seals in the steering gear. Prevents oil loss, stops oil loss in steering gears that drip and regenerates hardened seals. Holes and ducts of the steering gear are cleaned and the performance of the oil is thus revitalized. The noise levels are reduced, the service life is extended and the repair costs are lowered.

Suitable for steering gears that are filled with ATF II, ATF III, ATF VI or central hydraulic system oils. Add to the compensating reservoir of the steering system. 35 ml is sufficient for 1 liter of oil.

35 ml	12	1099 ⁸
-------	----	-------------------

Oil Smoke Stop

Oil Smoke Stop reduces the oil consumption of gasoline and diesel engines via the piston rings and valve guides. It prevents blue smoke and oil mist and acts against the loss in viscosity in motor oils. Oil Smoke Stop increases the compression ratio and reduces engine noise. Provides extra protection in engines with high levels of wear. Extends the service life of catalytic converters.

For all gasoline and diesel engines. Compatible with all commercially available motor oils. Not suitable for use in motorcycles with wet clutches.

Engine Flush Plus

Highly effective cleaning fluid for clearing the engine interior of troublesome deposits. Dissolves sludge and lacquer formers quickly and reliably. All types of oil-soluble and oil-insoluble residues are brought into suspension and removed during the next oil change. An engine which has been cleaned of deposits and contamination and which is then filled with fresh oil not contaminated with old impurities can develop its full performance characteristics. Wear in the engine is thus reduced and the service life is extended.

For cleaning and flushing out the oil circuits of gasoline and diesel engines. 300 ml sufficient for up to 6 l of motor oil. Can be safely used in vehicles with timing belt running in oil. Not suitable for use on motorbikes with wet clutches!

Octane Booster

Power pack tried and tested in motor sports that boosts the octane number of the gasoline and ensures that the engine can tap its full performance potential. Optimizes combustion immediately after addition and increases fuel efficiency. Significantly improves torque and acceleration, guaranteeing more driving pleasure. Ensures cleanliness in the fuel system and injection nozzles, thus preventing expensive repairs.

For all cars with 2 and 4-stroke gasoline engines. Specially developed for racing use and therefore not recommended for public road traffic.

Injection Cleaner

Removes deposits on injection valves, intake valves, spark plugs and in the combustion chamber and prevents new deposits from forming. Eliminates starting problems and rough engine running. Maintains all components of the gasoline injection system. Protects the entire fuel system against corrosion. Improves throttle response and compression. Optimizes the emission test values and the performance of the engine. Clean engines use less fuel and reduce the pollutant emissions.

Suitable for all gasoline engines. Preventive or remedial. To be added directly into the fuel tank. 300 ml sufficient for up to 70 l of fuel. Effect remains for up to 2,000 km. Tested for use with turbochargers and catalytic converters.

Petrol Stabiliser

Preserves and protects the fuel from ageing and oxidation. Prevents corrosion throughout the entire fuel system. Guarantees problem-free decommissioning of old-timers, convertibles, motorcycles, motor scooters, quads, lawnmowers chain saws and other gasoline-powered 2-cycle and 4-cycle engines. Increases reliability. With long-term effect.

Suitable for all gasoline engines – especially for preventative use. Tested safe with catalytic converters and turbochargers. Add to fuel and re-add every time you fill up. One filling with the 25 ml dispenser is sufficient for 5 l fuel. Also suitable for permanent use in engines that are rarely put to use.

Valve Protection for Gas Vehicles

Protects the engine valves and prevents overheating in the area of the cylinder head. The selected additive combination ensures optimum lubrication and clean combustion. Expensive repairs and engine damage are hereby prevented. Maintains the vehicle's performance and prevents loss of compression. Valve Protection for Gas Vehicles contains no heavy metal compounds and has no harmful effects on catalytic converters.

Area of use

Specially developed for gas-powered vehicles (CNG/LPG) – even with retrofit (bivalent) gas systems. Permanent use. Tested safe with catalytic converters and turbochargers. For adding directly in the dispenser of a required dosing device. Suitable for all standard dosing units. LIQUI MOLY recommends a dosage of 6 to 8 drops per minute for vacuum controlled dosing devices.

E10 Additive

State-of-the-art, ash-free fuel additive for improving combustion and faster acceleration in partial load range. Specially developed to compensate loss of performance from E10 fuel. Improves the vehicle acceleration and smoothness. Protects against high water content in the fuel. Compatible with all gasoline and additive qualities.

Used as an additive in the fuel of all 2-stroke and 4-stroke gasoline engines, especially for motor vehicle engines. Also suitable for two-wheeled vehicles.

Octane Plus

Octane Plus is a self-mixing combination of agents formulated according to state-of-the-art additive and fuel technology. Octane Plus is for universal use and increases the research octane number (RON) of the fuel by 2-4 points, depending on the RON. Thanks to the increased performance of the fuel, engine damage caused by knocking combustion is prevented. The increase of the octane number ensures low fuel consumption.

For increasing the octane number of gasoline.

Catalytic-System Clean

Protects the catalytic converter from clogging with soot. Cleans the injection system and the combustion chamber. The combustion improver works directly, which leads to an immediate, measurable reduction of the pollutants. Clean engines use less fuel and emit less CO2. Prevents corrosion in the fuel system. Tested for use with turbochargers and catalytic converters.

Suitable for all gasoline engines with a catalytic converter. Particularly as a preventative measure. 300 ml is sufficient for up to 70 liters of fuel. Effect remains for up to 2,000 km.

Diesel Particulate Filter Protector

Ensures optimum combustion of the fuel, reduces soot formation, lowers emissions and extends the service life of diesel particulate filters. Vehicles used for short trips and city traffic are especially affected by clogged diesel particulate filters. Regular use keeps the diesel particulate filter clean, avoiding expensive repairs and downtimes.

For diesel vehicles with diesel particulate filter if these are not fitted with an electronically controlled additive tank system for filter regeneration such as Citroën and Peugeot.

Diesel Smoke Stop Concentrate

Diesel Smoke Stop (C) is a highly effective diesel fuel additive that delivers an important contemporary impact. The product reduces soot emissions from diesel engines by accelerated soot combustion. Diesel Smoke Stop considerably improves the environmental compatibility of diesel passenger cars and trucks and prevents odor pollution and impairment of visibility. Diesel Smoke Stop maintains engine performance and reduces the frequency of repairs.

For all diesel engines, for agricultural and forestry as well as stationary diesel engines.

The contained Lubricity Improver improves the lubricity of the fuel. The additive increases the cetane number and thereby improves the cold-start behaviour, reduces the typical diesel knocking and ensures a better power output. Colour indicators help detect the additive fuel safely.

Additive for diesel fuel for all diesel engines, especially passenger cars and commercial vehicles engines. Highly suitable for the improvement of diesel fuel in tanks, in transport companies and gas stations. Ideal to prevent malfunctions in diesel fuels of medium and low quality.

RADIATOR ADDITIVES

Radiator Cleaner

Deposits in the cooling/heating system create blockages for heat exchange and they also block thermostat valves and control mechanisms. When engine temperatures are too high, the engine runs uneconomically and suffers excessive wear at considerable risk of damage. LIQUI MOLY Radiator Cleaner removes deposits containing oil and lime, and ensures that the engine runs reliably and at the optimum temperature. Does not contain aggressive acids or alkalis.

For all cooling water and heating systems. 300 ml are sufficient for 10 l cooling water. Compatible with all standard treating agents for coolants and antifreeze.

Small leaks caused by stone impacts, porous soldering points and hairline cracks in the cooling system are easy to localize (one notices that the cooling water level is sinking). Radiator Stop Leak completely seals such leaks immediately with ease. Secures the combustion chamber from damages caused by coolant admission.

For all cooling water and heating systems with and without water filters. Also suitable for aluminum and plastic radiators. The content is sufficient for 10 litres of coolant. Compatible with all standard treating agents for coolants and antifreeze. Can also be used as a preventative measure.

Special Tec F 0W-30

Low-friction motor oil based on synthetic technology that was developed specially for the requirements of Ford diesel engines. The excellent adhesion of the lubricant to the metal surfaces makes the oil outstandingly suitable for vehicles with start-stop systems. This high-performance lubricant meets the requirements of turbocharging and modern exhaust gas after-treatment systems such as catalytic converters and diesel particulate filters.

Specifications and approvals: ACEA C2, Jaguar / Land Rover STJLR.03.5007

LIQUI MOLY also recommends this product for vehicles or assemblies for which the following specifications or original part numbers are required: Ford WSS-M2C 950-A

Especially suitable for Volvo vehicles.

Low-friction engine oil based on synthesis technology – ensures reliable prevention of deposits, has an extremely high shear stability, reduces friction in the engine and provides excellent protection against wear. Optimally suited to state-of-the-art diesel and gasoline engines with and without multi-valve technology, Valvetronic, turbochargers and with and without diesel particle filters (DPF) or intercooling. It is especially suitable for long oil change intervals and high engine loads.

Specifications and approvals: ACEA A5/B5, API SL/CF, ILSAC GF-3, Volvo VCC 95200377

This lubricant was developed primarily for use in various Volvo models. Other manufacturers such as Mitsubishi, Renault, Jaguar, Honda etc. also use lubricants with these specifications in various vehicle types.

Synthoil Longtime Plus 0W-30

Special development for VW, Audi, SEAT and SKODA gasoline and diesel vehicles with service interval extension (also pump jet engines).

The fully synthetic low-viscosity motor oil from the Longlife 2 generation keeps the engine perfectly clean. Exceeds the high Volkswagen test requirements. Reduces fuel consumption in one of the toughest consumption tests in Europe (CEC-L-54-T-96/ MB M 111) by more than 2.5% as compared with the specified reference oil. Fast cold-start oiling provides excellent engine wear protection during the start and warm-up phase.

Specifications and approvals: ACEA A1/A5/B1/B5, VW 503 00/506 00/506 01

All-year oil for gasoline and diesel engines with and without pump-jet technology. Specially developed for vehicles with service interval extension (German abbreviation: WIV) from Audi, Volkswagen, Seat, Skoda. Tested safe with catalytic converters and turbochargers.

Special Tec AA 10W-30 Benzin

Modern premium class low-friction motor oil. The combination of unconventional base oils using synthetic technology together with the latest additive technology guarantees a motor oil that provides exceptional protection against wear, reduces oil and fuel consumption and keeps the engine clean while ensuring fast oil penetration of the engine.

Specifications and approvals: API SP, ILSAC GF-6A

LIQUI MOLY also recommends this product for vehicles or assemblies for which the following specifications or original part numbers are required: Chrysler MS-6395, Daihatsu, Ford, GM 6094 M, Honda, Hyundai, Isuzu, Kia, Mazda, Mitsubishi, Nissan, Subaru, Suzuki, Toyota

Optimum for modern Asian and American gasoline engines with multi-valve technology and turbocharging with and without charge air cooling. Especially suitable where there are long intervals between oil changes and heavy duty engine requirements.

**Leichtlauf Turbo 10W-40**

All-year low-friction engine oil based on high-tech synthesis technology. Low-Friction Turbo has been developed to meet the highest demands on modern, high-performance gasoline and diesel engines without extended maintenance intervals (WIV). It is tested and approved for catalytic converters and turbocharged engines, saves fuel and offers optimal protection against wear. The formulation has a positive effect on the sealing materials, and thus also on the leak-tightness of the engine. Low-Friction Turbo engine oil is thus ideally suited for vehicles with travelling distances above 100,000 km.

Specifications and approvals: ACEA A3/B4, API SL/CF, MB-Freigabe 229.3, VW 501 01/505 00

**Molygen New Generation 10W-40**

High-performance, low-friction engine oil for year-round use. The combination of unconventional base oils and advanced additive technology as well as the special Molygen additive ensures that the motor oil is of low viscosity with a high shear stability and reliably prevents the formation of deposits, significantly reducing frictional losses in the engine and providing the optimum protection from wear. The results are savings in fuel and an extended service life for the engine.

LIQUI MOLY also recommends this product for vehicles or assemblies for which the following specifications or original part numbers are required: ACEA A3/B4, API SL, Fiat 9.55535-G2, MB 229.3, Peugeot Citroen (PSA) B71 2300, Renault RN 0700/0710, VW 501 01/502 00/505 00

AUTOMATIC TRANSMISSION/CENTRAL HYDRAULIC/MULTI-DISC CLUTCH/STEERING GEAR OILS

Central Hydraulic System Oil 2300

Mineral central hydraulic system oil developed based on the highest requirements. Provides high thermal stability, ensuring ideal ageing resistance. Maximum wear protection and favorable friction behavior. Has outstanding low-temperature behavior. With increased corrosion-protection component proportion.

LIQUI MOLY also recommends this product for vehicles or assemblies for which the following specifications or original part numbers are required: MB 343.0

Area of use

For hydraulics in Mercedes-Benz passenger cars e.g. ride-height control, hydropneumatic suspension and hydraulic plants from ASD, 4Matic and tops. Comply with the vehicle or aggregate manufacturer's instructions.

Central Hydraulic System Oil 2400

Mineral central hydraulic system oil developed based on the highest requirements. Provides high thermal stability, ensuring ideal ageing resistance. Maximum wear protection and favorable friction behavior. Has outstanding low-temperature behavior. With increased corrosion-protection component proportion.

Specifications and approvals: ISO 7308

LIQUI MOLY also recommends this product for vehicles or assemblies for which the following specifications or original part numbers are required: LHM-Plus, Peugeot Citroen (PSA) B71 2710

For hydraulics such as ride-height control, hydraulic brakes, steering systems, etc. in PSA Group vehicles (Peugeot and Citroën). Can be mixed with older, mineral LHM formulas. A lubricant of this specification is also required in part for commercial vehicles for the hoisting devices in rear trailing axles and cab tilting mechanisms. Comply with the vehicle or aggregate manufacturer's instructions.

Central Hydraulic System Oil 2500

Synthetic hydraulic oil with ash-free additives. Special additives suppress the foaming tendency in the hydraulic systems even under top loads and protect the oil from premature ageing. This hydraulic oil can be used even in regions with Arctic climate due to the extremely low pour point.

LIQUI MOLY also recommends this product for vehicles or assemblies for which the following specifications or original part numbers are required: LDS, Peugeot Citroen (PSA) S71 2710

For use in central hydraulic systems such as power steering, level control systems, hydraulic brake boosters and hydro-pneumatic suspension. Hydraulic oil with these specifications is primarily required in vehicles from Peugeot/Citroen (PSA).

Liftgate Oil

Specially developed to ensure the exact functioning of the systems. By using Liqui Moly, the typical stick slip effect belongs to the past. Our special focus was on using exclusively high quality raw materials in order to meet the high requirements regarding maximum load bearing capacity, optimal wearing protection, the thermal stresses which can occur at the liftgates, as well as oxidation stability. Foam formation in hydraulic systems is prevented and sealing materials are held in excellent condition.

All-purpose use in liftgates as well as in hydraulic lifters in commercial vehicles throughout the year, if manufacturer's specifications are observed. Also suitable for systems for which a hydraulic oil of this classification is required.

LM 47 Long-Life Grease + MoS₂

High-grade special grease. The MoS₂ content provides the selected base grease with outstanding lubricity and high-performance properties that normal grease simply does not have. During operation, a permanently adhering, ultra-thin molybdenum disulfide film forms at the sliding surfaces. This film retains its lubrication properties for a long time even after the grease supply completely fails. Extremely long-lasting lubrication properties, can be delivered by central lubrication systems. Labeling according to DIN 51502 KPF2K-30. Operating temperature range: -30 °C to +120 °C, short term up to +130 °C.

For installation, maintenance and repair of vehicles, tools, construction, agricultural and printing machines. For highly stressed bearings and joints, splined shafts, threads and guides. For constant-velocity drive joints.

Brake Fluid DOT 3

Synthetic brake fluid based on glycol ethers and alkyl polyglycols. It contains inhibitors to prevent the corrosion of metallic brake components and to reduce oxidation at increased temperatures. The brake fluid has a high wet and dry boiling point.

Specifications and approvals: FMVSS 116 DOT 3, ISO 4925 Class 3, SAE J 1703

Area of use

Suitable for use with all disk and drum brake systems, as well as vehicle clutch systems for which a synthetic brake fluid of this specification is prescribed. The brake fluid is also suitable for use in ABS brake systems.

RUST SOLVENT/MULTIPURPOSE

Ceramic Rust Solvent with Freeze-Shock Effect

Rust solvent that effectively separates rusted parts from each other thanks to its extremely good penetration properties in combination with the lubricating effect of the ceramic particles. The freezing effect, which causes the metal parts to be loosened to shrink, additionally supports and accelerates this.

Air Flow Sensor Cleaner

Special active solvent for fast and gentle cleaning of sensitive components of the air flow sensor in gasoline and diesel engines. The Cleaner also distinguishes itself by means of a very fast evaporation that is free of residues. A dirty hot wire or hot plate in the air flow sensor leads to incorrect readings for calculating the fuel/air mixture. The starting and idling properties of the vehicle are thus impaired, the engine performance is reduced and the fuel consumption increases.

Removes contaminants at the hot wire or the hot plate of air flow sensors. Suitable for use in gasoline and diesel engines.

Pro-Line Engine Wear Protection

The low-friction lubricant MoS₂ creates a heavy duty slide film on all frictioning and sliding surfaces. It reduces friction, guaranteeing the aggregates run more smoothly. That produces these benefits: Significant fuel and oil saving, scientifically proven wear reduction, fewer breakdowns and outstanding antifriction properties.

Area of use

For all gasoline and diesel engines with and without diesel particulate filter. Can be mixed with all commercially available motor oils. 1 l is sufficient for approx. 25 l of motor oil. Tested for use with turbochargers and catalytic converters.

Pro-Line Engine Flush

Cleans the engine from the inside. Removes deposits from lubrication holes, oil screens, piston ring zone, etc. Reduces engine noise and oil consumption. Improves compression. Increases vehicle's reliability. Allows the fresh oil to develop its full performance after an oil change.

Suitable for all gasoline and diesel engines with and without diesel particulate filter (DPF). Tested safe with catalytic converters and turbochargers. Motor cleaning before an oil change. 500 ml sufficient for up to 5 l oil volume. Improves hydraulic function e.g. VVT, VANOS and other oil actuated switches and valves. Can be safely used in vehicles with timing belt running in oil.

Pro-Line Oil Loss Stop

Oil Loss Stop regenerates rubber and plastic engine seals (e.g., shaft seals and valve stem seals). Reduces oil consumption through piston rings (due to its uniform viscosity) and through valve guides (by regenerating the seals). Prevents blue exhaust smoke. Compensates for viscosity reduction and dampens engine noise.

Suitable for all gasoline and diesel engines with and without diesel particulate filter (DPF). Can be mixed with all commercial motor oils. 1 l is sufficient for 15 l motor oil. Sealing action effective after approx. 600 – 800 km.

1 l	6	5182 ¹
-----	---	-------------------

Pro-Line Visco-Plus

Reduces oil consumption. Keeps the viscosity of the motor stable. For constant oil pressure. Visco-Plus provides excellent protection against the oil's mechanical shearing loss even under the toughest conditions. Prevents motor oil thinning under frequent cold starts. The improved sealing of the moving engine parts reduces oil consumption. That makes it especially suitable for older cars. Reduces hydraulic valve lifter noise.

Suitable for all gasoline and diesel engines with and without diesel particulate filter (DPF). Can be mixed with all commercial motor oils. 1 l sufficient for up to 20 l oil volume.

1 l	6	5196 ¹
-----	---	-------------------

Pro-Line Automatic Transmission Cleaner

Cleans and frees the automatic oil circuit of deposits and residues. Provides for optimum gear shift performance and prolongs transmission service life

Suitable for all automatic transmissions and power steering systems without an additional system. 300 ml are sufficient for 6-9 l ATF oil volume.

1 l	6	5101 ¹
5 l	1	5179 ¹

Pro-Line Gear Oil Additive

An additive specifically developed for manual transmissions and differential gears. It significantly reduces wear and decreases temperature peaks. The transmission runs more quietly, enables softer shifting and heats up less strongly. Even old transmissions regain quiet running and increased performance through the smoothing of the tooth flanks. Increases reliability and provides antifriction properties through MoS₂.

For all manual transmissions, power take-off and differential gears. Do not use in fully automatic transmissions and gears with clutches that run in oil baths. 150 ml sufficient for approx. 15 l transmission oil.

--------	----	-------------------

Pro-Line Gear Oil Leak Stop

Stops oil losses in dripping transmissions. Regenerates hardened rubber and plastic seals. No more polluting oil stains. Protects clutches from oil fouling, prevents incomplete lubrication and transmission damages that are caused by too low of oil level.

For all manual transmissions, power take-off and differential gears. Do not use in fully automatic transmissions and gears with clutches that run in oil baths. 500 ml sufficient for approx. 10 l transmission oil.

Pro-Line Direct Injection Cleaner

Modern fuel additive with polyetheramine technology. Thanks to the use of active PEA, achieves the greatest cleaning effect in the fuel system as well as excellent piston and combustion chamber cleanliness. Considerably reduces the risk for damage to the engine due to low-speed pre-ignition [LSPI].

LIQUI MOLY also recommends this product for vehicles or assemblies for which the following specifications or original part numbers are required: Opel 95527846/95527847/95599923

Pro-Line Super Diesel Additive

With Cetane Plus for more engine power, less knocking, quieter run, easy starting. Cleans engine and injection system and prevents jet needles from fusing and gumming. Secures optimal use of fuel and saves energy during combustion. Reduces corrosion and wear. The plus for super diesel fuels. Suitable for low-sulfur diesel fuels.

For all diesel engines in cars, trucks, tractors, construction equipment and stationary engines, including turbocharged engines. Perfectly suited for preserving engines. Even during long standstills under extreme conditions. With long-term effect sufficient for 2,000 km. 1 l sufficient for max. 300 l diesel fuel.

Cleans engine and injection systems and reduces seizing up and resinification of the injector needles. Guarantees optimal operation and energy-saving fuel-burning. Prevents corrosion and wear. Suitable for low-sulfur diesel fuels.

Suitable for all diesel engines with and without a diesel particulate filter. To be added directly into the fuel tank. Fully compatible with all conventional diesel and biodiesel fuels. 1 l is sufficient for 500 l of fuel (dosage 1:500). Mixing takes place automatically. Tested for compatibility with turbochargers.

Pro-Line Diesel Particulate Filter Protection

Highly effective additive that reduces the build-up of particulates and improves the reliability of diesel particulate filters. Vehicles used for short trips and city traffic are especially affected by problems with clogged diesel particulate filters. Regular use keeps the diesel particulate filter clean, avoiding expensive repairs and down times. Diesel Particulate Filter Protection ensures optimum fuel combustion and reduces the build-up of particulates. This also contributes to reducing emissions.

Suitable for diesel vehicles with diesel particle filters, provided these have not already been equipped with an electronically controlled additive tank system for filter regeneration (as used by Citroen and Peugeot, for example). Also suitable for trucks and buses.

Gasoline Engine System Cleaner

Removes troublesome deposits from injection nozzles and intake valves. Thus enables and maintains optimum mixture formation. Thereby prevents engine damage caused by overheating of contaminated intake valves. Protects the entire fuel system against rust. Restores engines to original performance levels and provides low exhaust emissions values, thereby lowering fuel consumption.

Suitable for use in the workshop for all gasoline engines, particularly with direct injection. To be added directly into the fuel tank. Sufficient for up to 75 l of fuel.

Diesel Engine System Cleaner

Removes troublesome deposits from high-precision components, such as injectors and high-pressure pumps, and maintains optimal functionality. Also protects expensive injection system components through lubrication action improvers and corrosion inhibitors. Restores engines to original performance levels and provides low exhaust emissions values.

Suitable for use in the workshop for all diesel engines, including common rail and pumped jet high-pressure injection as well as in vehicles with or without a diesel particulate filter. To be added directly into the fuel tank. Sufficient for max. 75 l of fuel.

Radiator additives

Pro-Line Radiator Cleaner

Deposits in the cooling/heating system create blockages for heat exchange and they also block thermostat valves and control mechanisms. When engine temperatures are too high, the engine runs uneconomically and suffers excessive wear at considerable risk of damage. This concentrate safely removes deposits containing oil and lime and ensures that the engine runs reliably and at the optimum temperature. Does not contain aggressive acids or alkalis.

For all cooling water and heating systems. Compatible with all standard treating agents for coolants and antifreeze. 1 l sufficient for up to 50 l cooling water.

Pro-Line Radiator Stop Leak K

It's not easy to find small leaks caused by stone chipping, porous soldered connections or hairline cracks in the cooling system. Usually the only clue is in the reduced coolant. This dispersion completely seals this type of leaks immediately and safeguards the combustion chamber against damage caused by coolant ingress.

Area of use

For radiator coolant and heating systems with and without water filters. Also suitable for aluminum and plastic radiators. 250 ml sufficient for up to 40 l of coolant. Compatible with all conventional coolant additives and antifreezes. Can also be used preventively.

Pro-Line PTFE High Performance Lube Spray

Synthetic high-performance lubricant with PTFE for a wide range of applications. The high pressure and temperature resistances as well as the excellent water resistance help to ensure a lasting lubricant film. The solid lubricant ensures very good damping and emergency running characteristics. Extremely adherent and penetrative.

Universally used in the car sector as well as by craftsmen. For lubricating with tight tolerances and eliminating popping and creaking of hinges, joints, rods, steering levers and door retaining straps, etc.

Combination of state-of-the-art, highly effective wax-based agents. The adherent, elastic and transparent protective film offers outstanding, reliable long-term protection for inside and outside storage. The thin coating does not impair any subsequent welding work. Normal handling is possible soon after the non-oily film has been applied.

For inside and outside storage, transport and dispatch of machines and metal components.

300 ml 12 **3311**¹¹⁷

Weld Primer Spray

Fast drying welding point sealant for inert gas and spot welding operations. The high impact strength allows long-lasting protection to be achieved. The product protects against corrosion between bodywork panels. Good filling capacity and excellent coverage.

For sealing welding points in automotive workshops, accident repairs, automotive construction, welding workshops and locksmith's shops.

400 ml 6 **6000**¹

Primer Filler

Multipurpose primer filler for paint repairs. The high solids content allows optimal results to be achieved even when used for small repairs. Ideal for spot repair applications, particularly on sanding spots. Excellent adhesive and corrosion protection properties even on problematic substrates such as aluminum and galvanized sheet steel.

Primer and filler work in paint repairs and spot repair applications. For work on factory primers, old paintwork, aluminum, galvanized sheet steel and plastic components. Can be overpainted with all standard car paint systems. Serves as a base for all LIQUI MOLY adhesive/sealing compounds.

Pro-Line Engine Wear Protection

The low-friction lubricant MoS₂ creates a heavy duty slide film on all frictioning and sliding surfaces. It reduces friction, guaranteeing the aggregates run more smoothly. That produces these benefits: Significant fuel and oil saving, scientifically proven wear reduction, fewer breakdowns and outstanding antifriction properties.

Area of use

For all gasoline and diesel engines with and without diesel particulate filter. Can be mixed with all commercially available motor oils. 1 l is sufficient for approx. 25 l of motor oil. Tested for use with turbochargers and catalytic converters.

Pro-Line Engine Flush

Cleans the engine from the inside. Removes deposits from lubrication holes, oil screens, piston ring zone, etc. Reduces engine noise and oil consumption. Improves compression. Increases vehicle's reliability. Allows the fresh oil to develop its full performance after an oil change.

Suitable for all gasoline and diesel engines with and without diesel particulate filter (DPF). Tested safe with catalytic converters and turbochargers. Motor cleaning before an oil change. 500 ml sufficient for up to 5 l oil volume. Improves hydraulic function e.g. VVT, VANOS and other oil actuated switches and valves. Can be safely used in vehicles with timing belt running in oil.

Pro-Line Oil Loss Stop

Oil Loss Stop regenerates rubber and plastic engine seals (e.g., shaft seals and valve stem seals). Reduces oil consumption through piston rings (due to its uniform viscosity) and through valve guides (by regenerating the seals). Prevents blue exhaust smoke. Compensates for viscosity reduction and dampens engine noise.

Suitable for all gasoline and diesel engines with and without diesel particulate filter (DPF). Can be mixed with all commercial motor oils. 1 l is sufficient for 15 l motor oil. Sealing action effective after approx. 600 – 800 km.

LM 41 MoS₂-Suspension

Colloidal MoS₂ solid lubricant suspension in mineral oil. This product is fully stabilized by special preparation methods and formulated for use in engines, hydraulic fluids, compressors and industrial transmissions.

Added to the lubricating oils of engines, compressors, pumps, hydraulic plants, and industrial transmissions.

1 l	6	4051 ¹
-----	---	-------------------

Pro-Line Gear Oil Additive

An additive specifically developed for manual transmissions and differential gears. It significantly reduces wear and decreases temperature peaks. The transmission runs more quietly, enables softer shifting and heats up less strongly. Even old transmissions regain quiet running and increased performance through the smoothing of the tooth flanks. Increases reliability and provides antifriction properties through MoS₂.

For all manual transmissions, power take-off and differential gears. Do not use in fully automatic transmissions and gears with clutches that run in oil baths. 150 ml sufficient for approx. 15 l transmission oil.

150 ml	12	5198 ⁹
--------	----	-------------------

Pro-Line Gear Oil Leak Stop

Stops oil losses in dripping transmissions. Regenerates hardened rubber and plastic seals. No more polluting oil stains. Protects clutches from oil fouling, prevents incomplete lubrication and transmission damages that are caused by too low of oil level.

For all manual transmissions, power take-off and differential gears. Do not use in fully automatic transmissions and gears with clutches that run in oil baths. 500 ml sufficient for approx. 10 l transmission oil.

Viscoplus Heavy Duty Formula

High-performance additive for stabilizing the viscosity of motor oils. Keeps motor oil viscosity stable and ensures constant oil pressure. It provides superb protection against mechanical shear loss of the motor oil under even the harshest conditions. Prevents thinning of motor oil caused by frequent cold starts. Oil consumption is reduced by means of improved sealing of movable engine parts.

Suitable for all gasoline and diesel engines with and without diesel particulate filter (DPF). Can be mixed with all commercially-available motor oils. 1 l sufficient for up to 20 l of motor oil.

1 l	6	2697 ⁴

Hydraulic System Additive

For protecting and maintaining hydraulic systems and their sealing materials such as O-rings. Reduces friction, lowers the oil temperature, slows down oil aging and provides optimal protection of components of the hydraulic system, e.g. pumps, against wear. Prevents corrosion, foam and sludge formation and deposits. Reduces the risk of repairs and the downtimes and lowers the operating costs.

Area of use

For hydraulic systems in industry, in construction and commercial vehicles as well as for assemblies used for agriculture and forestry.

Super Diesel Additive

Removes deposits in the diesel injection system and in the combustion chamber and prevents new deposits. Maintains all components of the diesel injection system. Prevents any seizing up and gumming up of nozzle needles. Boosts the cetane number, improves the ignition performance of the diesel fuel and ensures smooth engine running. Protects the entire fuel system against corrosion and wear. Optimizes the emission test values and the performance of the engine. Clean engines use less fuel and reduce the pollutant emissions.

Suitable for all diesel engines with and without a diesel particulate filter. Preventive or remedial. Fully compatible with all conventional diesel and biodiesel fuels. 250 ml is sufficient for up to 75 l of fuel (dosage 1:300). Effect remains for up to 2,000 km. Pro-Line Truck Diesel Particulate Filter Cleaner

Soiled diesel particulate filters increase exhaust back pressure. As a result, engine performance is reduced and fuel consumption increases. The highly effective water-based combination of additives supports the cleaning of the diesel particulate filter when removed. Contaminants in the diesel particulate filter are dissolved, thus relieving you of the usual filter change, which in turn reduces running costs.

The product meets the biodegradability requirements stipulated in the German statutory regulations governing detergents.

For commercial vehicle diesel engines with removed diesel particulate filter.

5 l	1	5037
-----	---	------

Pro-Line Diesel Particulate Filter Protection

Highly effective additive that reduces the build-up of particulates and improves the reliability of diesel particulate filters. Vehicles used for short trips and city traffic are especially affected by problems with clogged diesel particulate filters. Regular use keeps the diesel particulate filter clean, avoiding expensive repairs and down times. Diesel Particulate Filter Protection ensures optimum fuel combustion and reduces the build-up of particulates. This also contributes to reducing emissions.

Suitable for diesel vehicles with diesel particle filters, provided these have not already been equipped with an electronically controlled additive tank system for filter regeneration (as used by Citroen and Peugeot, for example). Also suitable for trucks and buses.

1 l	6	5123 ¹
-----	---	-------------------

Anti-bacterial Diesel additive

Highly effective biocide with wide action spectrum against bacteria, yeasts and moulds. For preventive use in diesel-powered vehicles that have been decommissioned for a long time or are in low use such as construction machinery, commercial vehicles, motorhomes, passenger cars, storage tankers etc. and for sterilizing already infested tank systems. **Use biocides safely. Always read the label and product information before use.**

For all diesel engines both with and without diesel particulate filters – as a preventative measure or to deal with problems. Turbocharger tested. For adding directly to the fuel tank. Perfectly compatible with all conventional diesel and biodiesel fuels. One filling of the dispenser 25 ml (integrated in the cap) is sufficient during preventative use for 25 l fuel (dosing 1 : 1000) and for using during problems for 5 l fuel (dosing 1:200).

Diesel Additive K Green

Active substance with cleaning, dispersing and material-protective properties, matched to both proven and modern engines and operating supply requirements. The contained Lubricity Improver improves the lubricity of the fuel. The additive increases the cetane number and thereby improves the cold-start behaviour, reduces the typical diesel knocking and ensures a better power output. Colour indicators help detect the additive fuel safely.

Additive for diesel fuel for all diesel engines, especially passenger cars and commercial vehicles engines. Highly suitable for the improvement of diesel fuel in tanks, in transport companies and gas stations. Ideal to prevent malfunctions in diesel fuels of medium and low quality.

Protects the exhaust after-treatment systems.

High performance lubricants. Thanks to the new additive technology with improved wear protection characteristics and oxidation stability, this lubricant meets the requirements of state-of-the-art engine concepts. In addition, the ash-reduced formulation enables an improved compatibility with catalytic converters and diesel particle filters (DPF).

Specifications and approvals: ACEA E9, API CK-4/SN, Ford WSS-M2C 171-F1, Mack EOS-4.5, MB-Freigabe 228.31, Renault Trucks RLD-3, Volvo VDS-4.5

LIQUI MOLY also recommends this product for vehicles or assemblies for which the following specifications or original part numbers are required: ACEA E7, Caterpillar ECF-3, Cummins CES 20086, Detroit Diesel DFS 93K222, Deutz DQC III-10 LA, JASO DH-2, MAN M 3575, MTU Typ 2.1

Ideal for trucks, short- and long-distance buses, as well as for forestry, agricultural and construction machinery. Due to its good performance, this product is ideally suitable for use in state-of-the-art engines according to Euro IV, V and VI emission standards. Can be used in many vehicles without any limitations and is backward compatible. Can be used in engines of older Euro II and III emission standards, if manufacturers' specifications are observed.

Gear Hydraulic Oil TO-4 SAE 10

High-performance multipurpose oil made from high-quality raffinates. Due to the high thermal stability of the base oils, the aging process is significantly reduced even at elevated temperatures. This decisively helps reduce the formation of sludge, improves cleanliness and promotes the reliability of the transmission and hydraulic systems. Excellent oxidation resistance allows oil to be used for longer periods (changing intervals). The outstanding wear-protection technology is effective in both low and high load conditions. Specially developed additives guarantee a longer service life for wet clutches and ensure wet brakes work safely.

LIQUI MOLY also recommends this product for vehicles or assemblies for which the following specifications or original part numbers are required: Allison C4, Caterpillar TO-4, Komatsu

Excellent oxidation resistance allows longer oil change intervals. The outstanding wear protection technology is effective in both, low and high load conditions. Specifically developed additives ensure a longer service life for wet clutches and ensure wet brakes work safely.

LIQUI MOLY also recommends this product for vehicles or assemblies for which the following specifications or original part numbers are required: Allison C4, Caterpillar TO-4, Komatsu

Developed for construction equipment according to the high requirements of CATERPILLAR, ALLISON and KOMATSU. For power shift transmissions, transfer cases, final drives and hydraulic systems for which the manufacturer has stipulated a lubricant of this specification.

Truck Gear Oil AFD SAE 60

Developed and tested for use in Caterpillar vehicles. The lubricant possesses improved wearing protection as well as low foam formation and exceeds the high standards applicable to the respective machines. Oil with these specifications is used by Caterpillar, in part, also for initial filling at the factory. Depending on the application, the oil change intervals can be doubled compared to oils of the Caterpillar TO-4 specification.

Specifications and approvals: Caterpillar FD-1

Specifically for Caterpillar axles, differential and final drives without wet clutches or locks in off-road trucks or tipping lorries, pipe laying units, crawler loaders, etc. (except for machines with steel crawlers with elevated final drives of types D5M, D6M and 561M). Alternatively, the lubricant can also be used in axles and final drives where a lubricant of the Caterpillar TO-4 specification was previously used.

Synth ISO VG 150 Gear Oil

Fully synthetic high performance gear oil based on polyalphaolefins/esters. Due to the excellent oxidation resistance and thermal stability of the base oils, the aging process even at elevated temperatures is significantly reduced and the oil-change intervals can be extended. A high pressure and wear protection technology has been specially selected for this product to provide reliable protection even under heavy loads and to prolong the service life of the equipment. Outstanding corrosion protection behavior even with water and other forms of contamination present. Increases equipment efficiency as a result of reduction in downtimes for maintenance and stoppages. Liftgate Oil

Specially developed to ensure the exact functioning of the systems. By using Liqui Moly, the typical stick slip effect belongs to the past. Our special focus was on using exclusively high quality raw materials in order to meet the high requirements regarding maximum load bearing capacity, optimal wearing protection, the thermal stresses which can occur at the liftgates, as well as oxidation stability. Foam formation in hydraulic systems is prevented and sealing materials are held in excellent condition.

All-purpose use in liftgates as well as in hydraulic lifters in commercial vehicles throughout the year, if manufacturer's specifications are observed. Also suitable for systems for which a hydraulic oil of this classification is required.

Truck Long-term Grease KP2K-30

For roller and plain bearings. Under difficult conditions, extreme loads, dusty and moist conditions. Contains highly effective additives for corrosion and oxidation protection as well as EP additives that ensure the best possible lubrication, even under extreme conditions and high pressures. It is possible to extend the relubrication intervals thanks to the extraordinarily adherent lubricating film. Operating temperature range: -30 °C to + 130 °C. Pay attention to the manufacturer's instructions. Labeling according to DIN 51502: KP2K-30.

GREASES/PASTES

Commercial Vehicle Multi-Purpose Grease K2K-20

Lithium soap grease for lubricating plain and roller bearings. Guarantees long-term lubrication, has good sealing properties, is highly resistant to damp and dusty environments and moves well in central lubrication systems. Water-resistant, reduces friction and wear, extremely high pressure absorption capacity, has aging and shear stability as well as corrosion protection. Labeling according to DIN 51502: K2K-20. Operating temperature range: -25 °C to +120 °C. Short periods to +130 °C.

Area of use

As a universal lubricating grease for commercial vehicles such as construction machinery and machines and equipment used for agriculture and forestry as well as buses and trucks.

LM 145 Lubricant Compound

Soft, extremely adherent lubricant for open drive elements. The film, which dries thoroughly, is especially suitable for open drives which are exposed to dust, water or weather.

For all lubrication points which are directly exposed to environmental conditions. For lubrication of gearwheels, swing bearings, threaded spindles, chains, wire ropes, guideways and bearings. Used for agricultural and construction machinery, crane and conveyor plants and in shipping and transport companies.

LAMINATED GLASS REPAIR

Laminated Glass Repair System Case, Truck/Car

Repair system for laminated glass repair in a practical case. With all tools that are required for professional repair of minor to major damage to commercial vehicle and passenger car laminate glass windows. The system guarantees a safe, effortless operation. Thanks to the high-quality, extremely low-viscosity repair resin, even the finest cracks are reliably filled. Even stone cracks with fragmentation on the surface or with a heavily soiled impact point can be repaired with this in a first-class manner. With an extra large resin chamber for easy repair of large stone cracks or two impact points that are located close together.

For the professional repair of commercial vehicle and passenger car laminate glass windows.

VEHICLE CARE

Gloss Waxing Shampoo

Effective, multi-functional and pH-neutral quick-dispersing shampoo concentrate for washing vehicles by hand, and contains mild, skin-friendly, paintwork-friendly tensides and a high proportion of care ingredients. Washing, product care and drying are all made in a single procedure. The water film disperses immediately after rinsing, which helps stain-free drying of the vehicle. Among other applications, Gloss Waxing Shampoo is ideal for showrooms and general care, as previously applied polish and sealing products are not removed. The paintwork receives a high-gloss finish with long-lasting preservation and is thus protected against aggressive environmental influences.

For cleaning all materials in commercial motor vehicles, motorbikes, boats, mobile homes, garden furniture etc., including paintwork, chrome, rubber, plastic and glass.

Glass Cleaner

Concentrated, alcohol-based cleaning agent for cleaning glass panes and other hard, smooth, alcohol-resistant surfaces on buildings, vehicles etc. Removes the most stubborn contamination caused by spraying oil, grease, silicon, lime and soap, fingerprints etc. without any problems. Even difficult to remove contamination such as wax residue, paint spray and dead insects can be removed easily. Has unique drying properties, meaning it leaves a clean, smear-free surface without any residue. The cleaning cloths used also dry quicker, meaning they can remain in use for longer periods.

For windows, mirrors, tiles, ceramics, sheets and smooth, hard surfaces in trade, industry and the household, such as doors and work surfaces.

Acid Rim Cleaner

Acidic special cleaning agent for quickly removing heavy inorganic contamination. Even the most extreme contamination on rims (such as burned-in brake particles and stubborn environmental pollution) is removed quickly, thoroughly and with minimal contact thanks to the strong mineral acid base with no added hydrofluoric acids. Acid Rim Cleaner reduces the work needed for rim cleaning to an absolute minimum. Acid Rim Cleaner is suitable for use in biological industrial water treatment facilities, when used according to the applicable discharge conditions.

Specially designed for cleaning and maintaining the value of acid-resistant coated alloy wheel rims, steel wheel rims etc. Can also be used to remove even the most extreme contamination in washing facilities, on construction vehicles and in industrial areas, such as cement residue, lime and boiler scale. Suitable for oil separators.

Pro-Line Professional Commercial Vehicle Cleaner

High alkaline, phosphate-free and quick-separating cleaner concentrate for heavily contaminated surfaces on alkali-resistant substrates in the commercial vehicle sector. Particularly environmentally and waste water friendly thanks to the good biodegradability.

Area of use

For shipping vehicles, trucks, buses, vans, tank and silo trucks, agricultural machinery and equipment, construction machinery, cranes and communal vehicle fleets for superstructures, chassis, engines, rims, tarpaulins and vehicle interiors. Suitable for oil separators.

Motorbike Engine Flush Shooter

Cleaning fluid for clearing the engine interior of troublesome deposits. Dissolves sludge and lacquer formers. All types of oil-soluble and oil-insoluble residues are brought into suspension and removed during the next oil change. An engine which has been cleaned of deposits and contamination and which is then filled with fresh oil not contaminated with old impurities can develop its full performance characteristics.

Flushes out and cleans the oil circuits of motorcycles with four-stroke gasoline engines. The frequency of use is dependent on the degree of contamination of the oil circuit and on the quality of the oil used.

Motorbike Radiator Cleaner

Concentrate for cleaning coolant circuits. Deposits in the cooling/heating system create blockages for heat exchange and also block thermostat valves and control mechanisms. When engine temperatures are too high, the engine runs uneconomically and suffers excessive wear at considerable risk of damage. Removes deposits containing oil and limescale, and ensures that the engine runs reliably and at the optimum temperature. Does not contain aggressive acids or alkalis.

Suitable for all coolant circuits. Compatible with all conventional coolant additives and antifreezes.

LUBRICANTS

Bike Chain Oil Dry Lube

Outstanding long-lasting lubricant for the bicycle chain. Specially designed for dry and dusty conditions. Contains a selected combination of active ingredients that offer extreme wear protection as well as high penetration and adhesive properties. Tangibly reduces the friction of the chain and ensures particularly quiet operation.

Area of use

Specially designed for lubricating and maintaining bicycle chains in dry and dusty conditions. Also suitable for e-bikes.

Bike Chain Oil Wet Lube

Excellent long term lubricant with nano-technology for bike chains, especially developed for moist and dirty conditions. Ensures particularly smooth operation. Protects all metal parts against corrosion. Neutral in contact with plastics, paint and metals. Vegetable base to prevent environmental pollution.

Especially for lubrication and care of bike chains under wet or moist conditions. Also suitable for e-bikes.

Bike LM 40 Multi-Purpose Spray

Combination of active agents for universal use. Provides outstanding protection against corrosion, displaces water, dissolves rust and dirt and delivers excellent lubrication. Its outstanding penetrative capacity enables it to reach even the most confined spaces and reliably eliminate squealing noises. Does not react with plastics, paints or metals.

Its outstanding properties give it a wide range of applications on all bicycles. Also suitable for e-bikes.

SAE 30

Marine Single Grade SAE 30

Single-grade mineral motor oil for gasoline and diesel engines with a naturally high viscosity index. It provides for a stable lubricating film even under extreme operating conditions. Its high alkaline reserve prevents corrosion even when diesel fuel with a high sulfur content is used. Lightly doped for use in classic engines as well. Prevents sludge formation and offers reliable protection against wear.

Specifications and approvals: ACEA E2, API SJ/CF/CF-4

LIQUI MOLY also recommends this product for vehicles or assemblies for which the following specifications or original part numbers are required: MAN 270, Volvo VDS

For universal use in gasoline and diesel engines and in transmissions for which the manufacturer specifies an SAE 30 mineral oil. Particularly suitable for older engines. Tested for compatibility with turbochargers.

**Bio Saw Chain Oil 68**

Environmentally-friendly chain oil based on high-grade vegetable oils. The special formula used in BIO SAW-CHAIN OIL 68 guarantees fast biodegradability (Test CEC L-33-T-82: in 21 days > 90%) plus toxicological safety. The outstanding adhesion properties and the optimal lubrication properties guarantee that all moving parts such as the chain links and track links are ideally lubricated and protected against wear. The favorable viscosity-temperature behavior ensures all-year use at high and low outdoor temperatures.

For lubricating chains of all high-performance motor saws and reciprocating saws. For extreme conditions such as sawing hardwoods.
